

## DIN EN 71-2

### EN 71-2

#### SCOPE

The test device according to EN 71-2 is used to determine the flammability of toys under specified test conditions.

#### PRINCIPLE

Specimens of various types are mounted on suitable specimen holders and flamed with a burner. A protocol documenting the characteristics of the fire test must be drawn up after all standard tests.

#### SPECIAL FEATURES

Electric fan  
Electronic stopwatch with software

#### SCOPE OF DELIVERY

Test chamber with electrical fan and ventilation flap  
Burner with linear guide and mechanical fine control valve with numeric display  
Specimen holder EN 71-2 4.2.5, angle adjustable  
Specimen holder fixture with linear guide  
Specimen holder EN 71-1 4.2.2, Headdress  
Specimen holder EN 71-2 4.5, Soft fillings  
Drip tray  
Electronic stopwatch with software  
Flame gauge

#### DIMENSIONS

Width x depth x height: approx. 1186 x 893 x 1953 mm\*  
Weight: approx. 100 kg

#### SUPPLIES

Propane gas / natural gas  
Electrical current 230 VAC

#### TO BE PROVIDED BY THE CUSTOMER

Flue gas exhaust system DN200

Specimen holder 4.2.5

Specimen holder 4.5

Specimen holder 4.2.2
